

Overview

My Pathway is a personalized digital soft skill development tool hosted by our leadership development partner, DDI. This tool is available for all RealPage employees and can be used for on-going career development as a complement to RealPage University (RPU).

What are the benefits of using My Pathway?

- **Practicality** - the learning recommendations are targeted to your unique development needs.
- **Self-paced learning** – you can complete the courses anytime, anywhere, at your speed.
- **Efficiency** – the courses range from 15 – 30 minutes.
- **Variety of topics** – the platform has 34 micro-courses, 14 podcasts and 18 blogposts that target competencies to manage people, manage work and manage change.
- Soft skill development for *all RealPage employees*

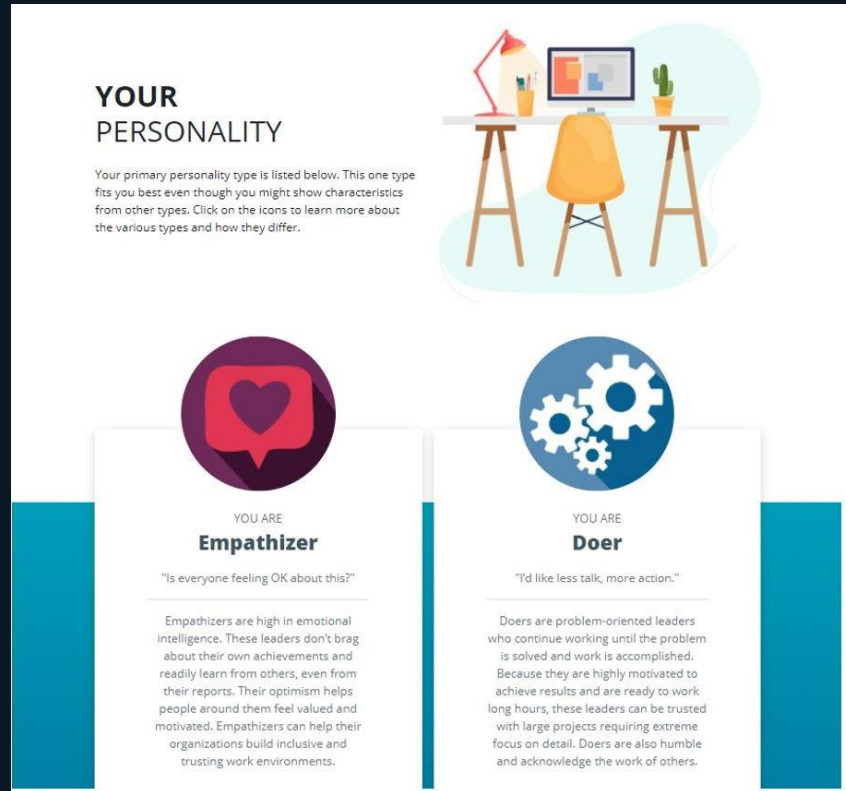

Who can use My Pathway?

- New and upcoming RealPage leaders
- Employees can use My Pathway to stretch, grow, or prepare for future leadership roles
- Leaders and the HR team can take advantage of the learning courses as it applies to their roles and team situations – coaching, conflict management, emotional intelligence, building trust, etc.

How do I use My Pathway?

Upon logging on to My Pathway, you be asked to complete a 15-minute self-assessment. Immediately after completing the assessment, you will get a two-part report – Your Personality and Your Skills.

Your Personality

YOUR PERSONALITY

Your primary personality type is listed below. This one type fits you best even though you might show characteristics from other types. Click on the icons to learn more about the various types and how they differ.

YOU ARE Empathizer

"Is everyone feeling OK about this?"

Empathizers are high in emotional intelligence. These leaders don't brag about their own achievements and readily learn from others, even from their reports. Their optimism helps people around them feel valued and motivated. Empathizers can help their organizations build inclusive and trusting work environments.

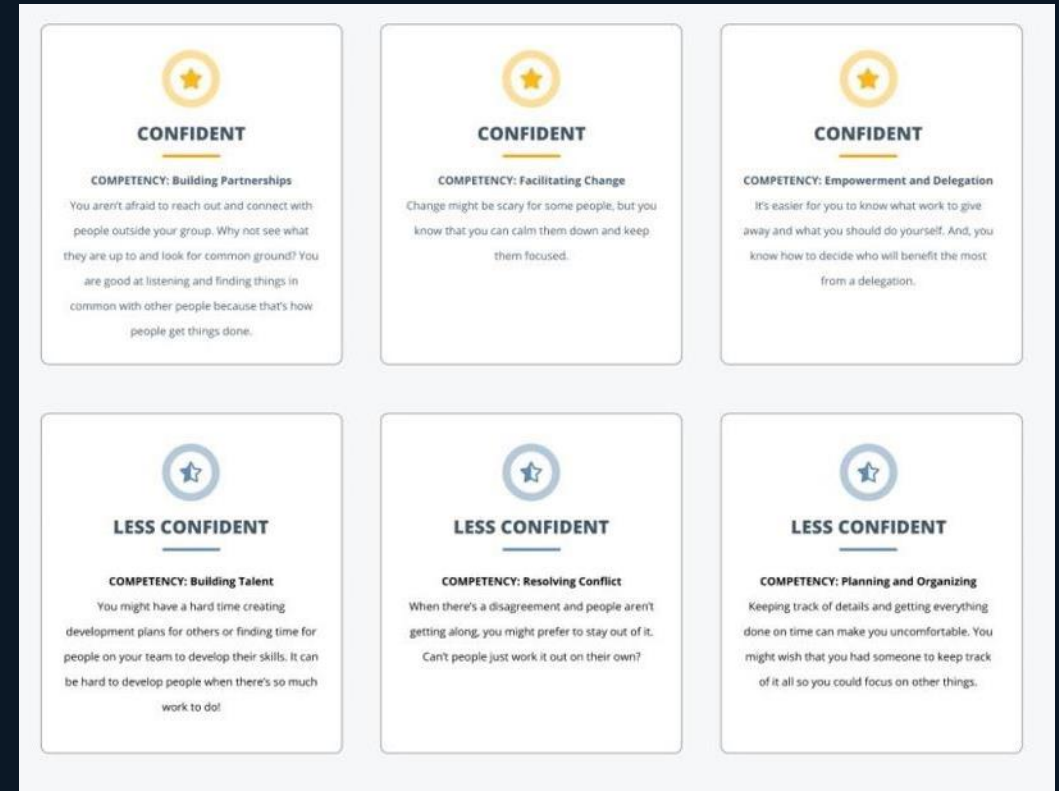

YOU ARE Doer

"I'd like less talk, more action."

Doers are problem-oriented leaders who continue working until the problem is solved and work is accomplished. Because they are highly motivated to achieve results and are ready to work long hours, these leaders can be trusted with large projects requiring extreme focus on detail. Doers are also humble and acknowledge the work of others.

- The assessment measures personality statements and the algorithm assigns learners between one and three personality profiles.
- The Your Personality report gives an overview of the personality type[s], what to look out for, and how the personality profile[s] may impact their development.

Your Skills

 CONFIDENT COMPETENCY: Building Partnerships You aren't afraid to reach out and connect with people outside your group. Why not see what they are up to and look for common ground? You are good at listening and finding things in common with other people because that's how people get things done.	 CONFIDENT COMPETENCY: Facilitating Change Change might be scary for some people, but you know that you can calm them down and keep them focused.	 CONFIDENT COMPETENCY: Empowerment and Delegation It's easier for you to know what work to give away and what you should do yourself. And, you know how to decide who will benefit the most from a delegation.
 LESS CONFIDENT COMPETENCY: Building Talent You might have a hard time creating development plans for others or finding time for people on your team to develop their skills. It can be hard to develop people when there's so much work to do!	 LESS CONFIDENT COMPETENCY: Resolving Conflict When there's a disagreement and people aren't getting along, you might prefer to stay out of it. Can't people just work it out on their own?	 LESS CONFIDENT COMPETENCY: Planning and Organizing Keeping track of details and getting everything done on time can make you uncomfortable. You might wish that you had someone to keep track of it all so you could focus on other things.

- The Your Skills report focuses on confidence level regarding leadership skills.
- The report highlights the three skill areas where you are most confident and the three skill areas where you are least confident.
- Personalized learning recommendations are based on the 3 skills the learner was least confident in and can be found under See Recommendations.
