

TERMINATION AND EXTENSION PROCESS GUIDE

TERMINATION PROCESS

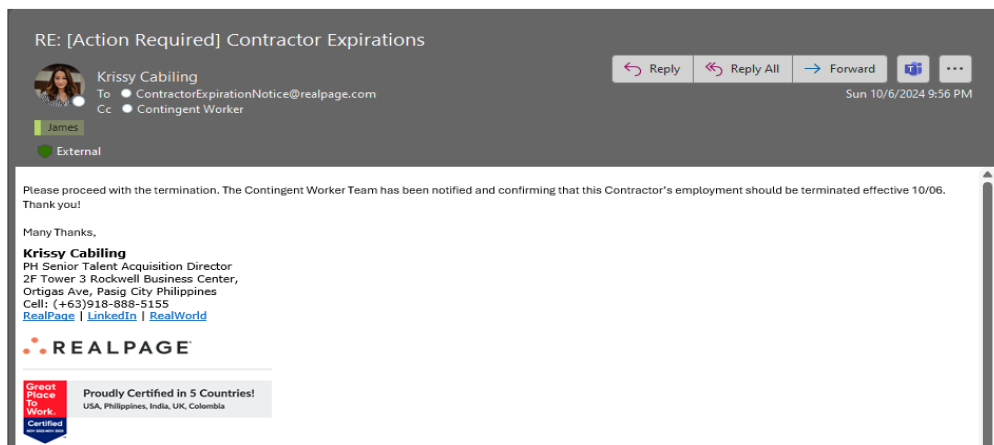

SYSTEM GENERATED EXPIRY NOTIFICATION EMAIL

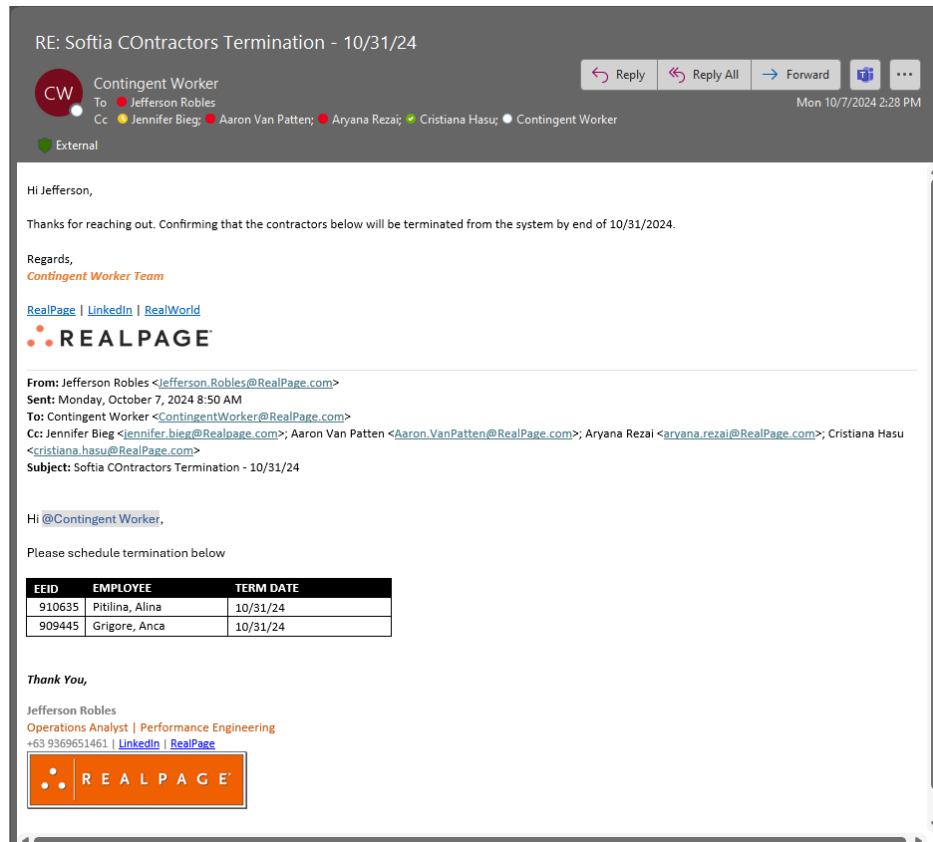

Our system is set to send this **Expiry Notification Email** to the Managers to notify them of the upcoming end-date of their contingent workers. These are being sent 30, 14, or less than 7 days before the account expiration.

Sample email that the manager will receive:

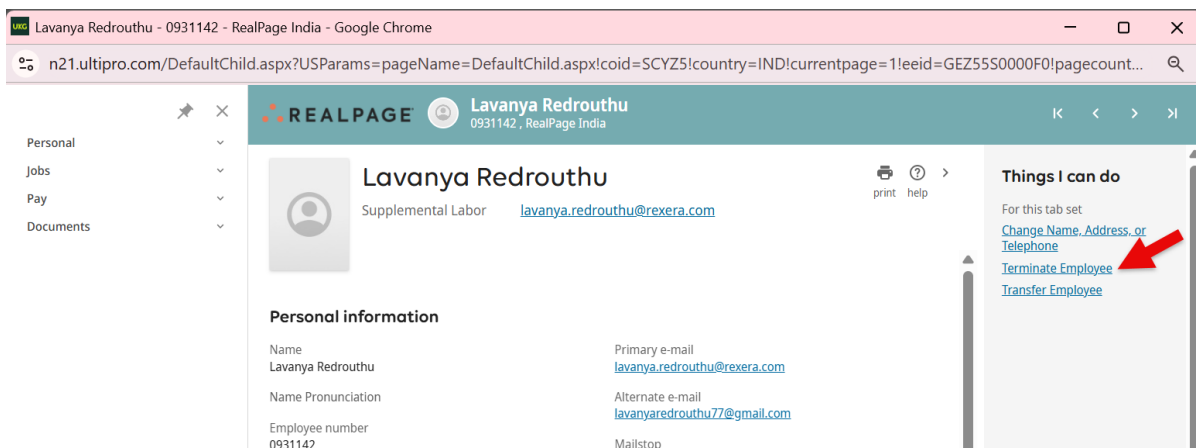

1. The Manager will send an email requesting the termination of their contractor.

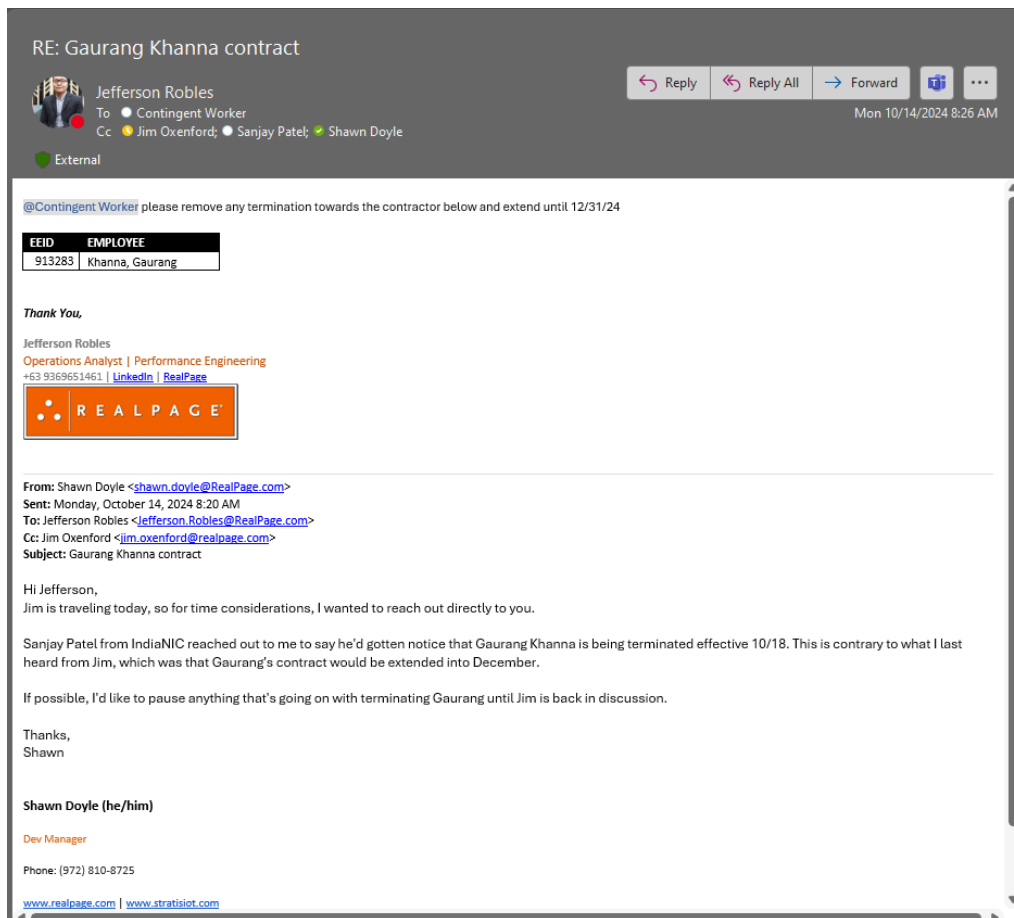

- To pull up the contractor's profile, go to **UKG → Administration tab → Employee Admin → My Employees** and search for the contractor's profile using the filters option.
- Click the contractor's profile. In the right panel, select **Terminate Employee**, update the required fields, then click **Save and Submit**.
 - Termination date: refer to the request
 - Termination reason: select contract ended
 - Regrettable: select non-regrettable

4. Inform the manager that the termination has been set on the system.
 - It is ideal to track all termination requests for future reference.
 - For multiple contractor terminations, use the bulk [termination template](#) and complete the required fields.
 - Avoid delayed processing of termination requests.
 - If a manager sends a late termination request, keep track of the reason as this will be audited on a weekly basis.
 - A weekly email will be sent by **HR Compliance** team where we need to indicate on a report the reason for late terminations.

EXTENSION PROCESS

1. The Manager will send an email requesting an extension of their contractor.

2. To pull up the contractor's profile, go to [UKG](#) → **Administration** tab → **Employee Admin** → **My Employees** and search for the contractor's profile using the filters option.

- On pop-up page, click **Change Name, Address, or Telephone** on the right side panel.

- To check if there's a pending termination request, go to Terminate Employee on the right-side panel and check if there's a pending transaction. If one exists, request HRIS to cancel it, as the termination will still be processed unless cancelled.

Below example shows that there is a pending termination request.

- For multiple contractor extension, use the bulk [extension template](#) and complete the required fields.

Common Issue: Contractor Access Revoked Due to Missed Extension

If a contractor's access is revoked because the extension was not submitted on time, advise the Hiring Manager that they are responsible for requesting access reactivation.

A. If the contractor is still active in UKG:

1. Update the contractor's end date in UKG.
2. Instruct the Hiring Manager to contact **User Access** (UserAccess@RealPage.com) and **SailPoint Support** (SailPointSupport@RealPage.com) to request access reactivation.

B. If the contractor is terminated in UKG:

1. Instruct the Hiring Manager to contact **HRIS** to reactivate the contractor in UKG and update the end date.
2. Once the contractor is active in UKG, have the Hiring Manager contact **User Access** and **SailPoint Support** to reactivate system access.

Note: Follow the same reactivation process if the contractor's access is revoked due to a missed extension update by HRSC.
