

TA performs the initial handoff; Talent Services owns and manages all subsequent onboarding activities.

All process boxes after the initial endorsement are owned and managed by Talent Services.

Process summary

At a glance

Talent Acquisition endorses the candidate to Talent Services for the onboarding discussion. Talent Services then owns the full onboarding workflow, including PEME endorsement, RecruitIQ setup, launching the onboarding packet, validating candidate data and forms, and monitoring requirements and PEME/BI results. Talent Services then moves the candidate to Hired - Sent to HRIS only after the onboarding paperwork is complete and the offer is accepted. Post-hire communications and the ND allowance contract are completed on their documented schedules when applicable.

1. Is the package type entered?

Yes: move to Pre-Hire Screening PH. No: resolve the missing package type before advancing.

2. Did the candidate receive the Welcome Letter?

No: check Message tab, resend the Welcome Letter, and verify the email address if needed. Do not advance to Start Onboarding again.

3. Are PEME or BI findings/discrepancies present?

Yes: notify the employee and coordinate vendor resolution or FTW assessment; update the relevant tracker/CM.

4. Is the hire ready for HRIS?

Talent Services advances only after onboarding paperwork is complete and the offer is accepted. Check the Employee tab first.

Quick reference notes

- Onboard Status shows task state: green = completed, orange = in progress, gray = not started.
- If the launched candidate is not visible, search by Requisition ID, open Candidates, filter Start Onboarding, then open Onboard Status.
- Review the Employee tab before HRIS handoff; the data syncs to UKG when Hired - Sent to HRIS is selected.
- If the start date changes after HRIS handoff, notify HRIS; if onboarding is still in progress, update the Employee tab.
- Recurring communications: completion report Monday and Wednesday; eligible new-hire list Friday; Security Bank information on first day.
